### MATH513 Practical Presentation

10570155, 10696253, 10701983

10/12/2020

### Introduction

- Samsung and Apple
- Flagship phones chosen
  - ► S20FE
  - ▶ iPhone12
  - ► S20

#### **Tools Utilised**

- Rstudio
- RTweet
- Twitter Developer API

SAMSUNG

### Research

### **Choosing Twitter for Analysis**

- !!! Why did we choose Twitter data ## Ref needed ##
  - Twitter data provides up to date information for companies to analyse for customer feedback
  - Data can provide useful information to guide product teams when analysed correctly

### **Hashtags**

- @SamsungMobile https://twitter.com/SamsungMobile
- @Apple https://twitter.com/Apple
- @tim\_cook https://twitter.com/tim\_cook

# Data Cleaning and Feature Engineering

### **Data Cleaning**

- Duplicate tweet and user observations were removed
- Tweet text and user bios were cleaned

### **Feature Engineering**

- Users were marked as potential bots
- User country was extracted from the location of their profile
- Tweets were marked as potential spam
- Product features extracted from the tweets
  - ▶ Display, Battery, Camera, Price, and 5G Capability
- An overall sentiment score was calculated for each tweet

## Summary of Collected Data

**Total Tweets:** 73690

Total Features: 5 (Display, Battery, Camera, Price, and 5G)

Table 1: Summary of Tweet Data

Product	Number of Tweets	% Spam Tweets	% Feature Tweets
Galaxy S20	13147	3%	20%
Galaxy S20 FE	28923	19%	19%
iPhone12	31620	13%	7%

Table 2: Summary of User Data

Number of Users	% Bot Users	Unique Countries
35051	>1%	163

## Results - Time Series

## Results - Sentiment Analysis

Overview of sentiment analysis

Choice of feature to analyse

## Results - Sentiment Analysis

**GRAPH HERE** 

## Results - Sentiment Analysis

**GRAPH HERE** 

# Improvements & Further Study

#### **Improvements**

Google Maps API to have region filter

Look at mentions of apple in samsung and vice versa

# Issues and overcoming them

- Extraction by date
- Duplication
- Time limits
- Foreign languages
- •

### Conclusions

- Twitter data provides up to date information for companies to analyse for customer feedback
- Data can provide useful information to guide product teams when analysed correctly
